15 Years of experience

PROFILE SUMMARY

Senior Technical Lead with 14+ years of experience designing, architecting and delivering enterprise-grade applications using .NET (ASP.NET Core, .NET Framework), C#, SQL Server and Angular. Proven track record in solution design, REST API development, microservices architecture and enterprise integrations including iManage. Hands-on experience with Microsoft Azure (Blob Storage, Key Vault, Application Insights, Azure AI), GitHub Actions CI/CD, Semantic Kernel and Azure OpenAI for AI POCs. Strong in leading teams, mentoring, performance optimization, IIS automation using PowerShell and driving re-platforming from on-prem to cloud VMs.

WORK EXPERIENCE

Manager

KPMG Global services private limited
Oct 2019 - Present

- Lead design, development and delivery of enterprise applications using ASP.NET Core, C#, SQL Server, Angular and Microsoft Azure.
- Implemented CI/CD pipelines with **GitHub Actions** and managed IIS deployments and production support.
- Drive enterprise API integrations including *iManage* and participated in cloud re-platforming (IaaS) and automation using PowerShell.
- Mentor developers, conduct code reviews, perform performance optimization and collaborate with stakeholders and vendors to ensure high-quality delivery.
- **Promoted from Assistant Manager to Manager** in recognition of technical leadership and delivery excellence.

KEY SKILLS

C#

ASP.NET Core

ASP.NET Web API

Microsoft .NET Framework

SQL Server

Entity Framework Core

Angular

Microservices

Redis

RabbitMQ

Ocelot

Microsoft Azure

Azure OpenAI Service

Github Actions

PowerShell

CERTIFICATION

- AI- 900
- AZ - 204
Valid upto September 2025
- Azure AI Engineer Associate
Valid upto April 2026

PROJECTS

iManage Cloud Migration & Integration Project 4 Months

- Led migration of a multi-component enterprise application from on-premises to cloud VMs (IaaS) and transitioned iManage integration to iManage Cloud APIs.
- Re-platformed components (.NET Framework 4.8, Web API, EF, SQL Server 2017, Redis) to cloud VMs and re-established secure connectivity to cloud services.
- Automated server and scheduler tasks using PowerShell to reduce manual effort.

Document & Reports Management System 21 Months

Senior Software Engineer

TEK Systems Global Services

Oct 2016 - Aug 2019

- Developed and led modules for enterprise web applications using ASP.NET Core, ASP.NET MVC, Web API, Entity Framework and Angular.
- Performed requirement analysis, effort estimation, technical design, unit testing and production support.
- Collaborated with onsite teams and stakeholders to deliver enhancements and ensured code quality via reviews and mentoring.

Senior Software Developer

BrickWork India

Jul 2015 - Oct 2016

- Owned end-to-end delivery of a business-critical web application using .NET technologies.
- Handled requirement analysis, design, development, testing, deployment support and production maintenance while coordinating with business owners.

Project Engineer

Wipro Technologies

Jun 2011 - Jul 2015

- Worked on enterprise application development using ASP.NET Web Forms, C#, Windows Forms and SQL Server.
- Delivered features, fixed production defects, wrote SQL queries/stored procedures and supported deployments while following SDLC best practices.

EDUCATION

B.Tech / B.E. - Electronics and Telecommunication Engineering

2011

West Bengal University of Technology (WBUT)

Grade - 7.6/10

Class XII

2005

- Developed and maintained an enterprise-scale Document Management platform to securely manage, store, retrieve, and process business documents with workflow automation and metadata synchronization.
- Designed REST APIs, admin UI and incorporated CI/CD automation and cloud integration for scalability and reliability.

Next Gen CLEAS

27 Months

- Designed and implemented an API services platform using Microservices Architecture to support integration with a SAP Fiori UI.
- Developed APIs with .NET Core, Web API, C#, SQL Server and EF Core; architected microservices using Docker, Ocelot API Gateway and Redis caching.

DCT (Data Collection Tool)

18 Months

- Led design and development of a data management platform enabling collection, processing, notification and reporting across multiple workflows.
- Implemented workflow processing, state-based notifications and advanced reporting with export capabilities.

Mind Hive

12 Months

- Designed registration and publication modules for a digital platform used by institutes, governments and NGOs to publish policies and initiatives.
- Led development to ensure scalability, security and data compliance for multi-category registrations.
